- Vite
- Git

Experiences

Frontend Engineer   **03/2024 to current**
Outlier AI   **United States**

- Evaluated JavaScript, React, CSS and HTML code.
- Reviewed AI-generated code to ensure it meets quality standards and good development practices, such as performance optimization and readability.
- Refactored AI-generated components for improved efficiency, reusability, and adherence to React design patterns, including functional components and hooks. Enhanced code maintainability and error detection by introducing TypeScript static typing. Optimized styling management and ensured visual consistency through Tailwind CSS integration.
- Participed in code reviews, making sure submissions were correct and followed styles guidelines.

Web E-Commerce (https://web-e-commerce-seven.vercel.app/)   **Personal Project**

- Developed a responsive and dynamic user interface using React and Tailwind CSS, ensuring a smooth shopping experience across all devices.
- Delivered an intuitive user journey from product selection to checkout, incorporating real-time validation.
- Implemented a shopping cart system using the `use-shopping-cart` library for optimized product selection and order management.
- Built with Next.js and deployed on Vercel, ensuring fast loading times and server-side rendering for enhanced performance and SEO.
- Integrated Stripe payment gateway for secure and seamless transaction processing, enabling smooth user checkout experiences.

- **Soft Skills**: Communication, time management, attention to detail, team collaboration.
