- Android Studio
- Xcode
- Figma
- Jira
- Slack
- Microsoft Teams
- Github – Bitbucket
- Postman – Insomnia

LANGUAGES

- Spanish – (Native)
- English – (C1)

PROFESSIONAL RESUME

Frontend developer with experience in building web and mobile apps. I'm good at finding patterns and solving problems, and I focus on details that make interfaces easy and enjoyable to use. I work well in teams and love contributing my skills to create user friendly, eye catching applications.

EXPERIENCE

March 2024 – Present

Outlier

- Conducted in depth evaluations and optimizations of JavaScript, React, CSS, and HTML code to enhance performance, scalability, and maintainability across the platform.
- Improved development workflows by refactoring components for efficiency, reusability, and alignment with React standards, utilizing functional components and hooks.
- Enhanced styling consistency and reduced technical debt by integrating Tailwind CSS, ensuring both visual consistency and easy maintenance.

PROJECTS

X Clone

Developed a social media platform clone using the MERN stack, implementing features such as user authentication, notifications, and real time updates to enhance user interaction. Optimized the backend for secure data handling and integrated responsive UI components for a smooth, user friendly experience.
